RxVIP Concierge partners with VitalFlo to provide COPD, Asthma and CHF Remote Patient Monitoring

(Westbury, NY – May 25, 2020) — RxVIP Concierge today announced that it has teamed up with VitalFlo Inc. to license VitalFlo’s proprietary Remote Patient Monitoring software platform for Chronic Obstructive Pulmonary Disease (COPD), Asthma and Congestive Heart Failure (CHF) patients. RxVIP Concierge said it plans to use the VitalFlo platform to enhance what it does with its novel “[PharmD Concierge](#)” program in which it assigns licensed pharmacists to assist physicians with assessments, screenings, remote patient monitoring, chronic care management and direct observed therapy.

“VitalFlo provides ‘best of class’ respiratory monitoring support for our clients’ patients” said Ken Sternfeld, RPh, founder and CPO of RxVIP Concierge. “Their powerful dashboard system allows our Pharmacists to monitor respiratory flows timed against pollen counts and overlay that data across the medications on file for the patient.” Sternfeld also said that the VitalFlo system would allow Pharmacists to make rapid corrections in medications for respiratory distressed patients rather than time-consuming titration and experimental changes, thus proving superior outcomes to the disease management of COPD, Asthma and CHF.

RxVIP Concierge is launching VitalFlo in over 40 provider offices in the next few months as it rolls out its program nationwide.

“We are excited to be working with RxVIP Concierge’s program, which places qualified pharmacists into medical practices to assist patients with chronic disease management such as COPD and Asthma” said Luke Marshall, CEO of VitalFlo. “We will be working closely with RxVIP to equip pharmacists with modern approaches like VitalFlo’s remote monitoring platform. Together, VitalFlo and RxVIP will make a difference for thousands of patients, improving outcomes amid rapid policy and reimbursement changes in virtual patient care.”

About RxVIP Concierge:

RxVIP Concierge helps providers and provider networks provide excellent patient care and restore their diminished revenues by deploying innovative solutions that involve a simple Telehealth product for patients but also incorporate licensed Pharmacists to assist providers in capturing critical patient data, providing assessments, screenings and clinical management.

About VitalFlo:

VitalFlo is a digital health company that helps clinical teams remotely monitor their chronic respiratory patients. With patient devices for remotely monitoring lung function and local air quality, VitalFlo delivers patient status and potential exacerbation trigger data back to clinical teams to make rapid corrections to care plans and improve outcomes. Our remote physiologic monitoring platform is also available to academic researchers to help them conduct virtual clinical trials.
